

SOLAR WATER CUBE

Fresh water storage:

18 pieces of water tank a 2,000 liters (36,000 liters)

Drinking Water Storage:

2 pieces of water tank a 2,000 liters (4,000 liters)

Drinking water treatment:

UV water disinfection, flow rate: Minimum 700 liters / h upon customer request

Electrical connection: 230V / 35W

Desalination plant for seawater and brackish water COMPACT

Desalination capacity: Minimum 30 liters / h upon customer request

Electrical connection: 230V / 370W

Monitoring:

Level and water quality monitoring

UV monitoring system

UV intensity display

Other equipment:

LED lighting

Active ventilation: 1,200m³ / h

Temperature and humidity control
